

21 OER Aeres University of Applied Sciences COMPETENCES

Within the master Agribusiness Development and the master Food Systems Innovation the new Professional Master Standard is adopted. This standard is based on the Dublin descriptors as adopted in the Qualification Framework of the European Higher Education Area. Students need to achieve level 7 of these Dublin descriptors.

Knowledge and understanding

Students have demonstrated knowledge and understanding that is founded upon and extends and/or enhances that knowledge and understanding typically associated with Bachelor's level, and that provides a basis or opportunity for originality in developing and/or applying ideas, often within a research context

Applying knowledge and understanding

The students can apply their knowledge and understanding, and problem solving abilities in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their field of study

Making judgements

The students have the ability to integrate knowledge and handle complexity, and formulate judgements with incomplete or limited information. That include reflecting on social and ethical responsibilities linked to the application of their knowledge and judgements;

Communication

The students can communicate their conclusions, and the knowledge and rationale underpinning these, to specialist and non-specialist audiences clearly and unambiguously

Lifelong learning skills

The students have the learning skills to allow them to continue to study in a manner that may be largely self-directed or autonomous. ▸
